Learning For Life Programme (LLP)

Learning to Serve, Serving to Lead, Leading to Transform

How do entrepreneurs pitch their ideas successfully to the public and bring them to life? How do social activists advocate and rally others for a good cause? And what do these groups of people all have in common?

The answer: They are all changemakers and transformational leaders!

At Regent Secondary School, we believe that all students can be transformational leaders and changemakers who have the power to make a difference within the school community and in society. Our Learning for Life – Community Youth Leadership Programme harnesses the Student Agency Model 4-A Approach (Aware – Action – Amplify – Advocate) to provide students with opportunities to lead, raise awareness, and inspire action amongst their peers to be advocates of change.

To build awareness, students are exposed to contemporary issues before working on their Values in Action projects. This allows them to contribute to the local community in meaningful ways. To amplify their actions and serve

as advocates for the causes they are passionate about, opportunities are provided for senior students to partner and share their experiences with their juniors.

These outreach efforts culminate in Together RegentCares Day in August, a ground-up initiative that sees the Regent family coming together as one to contribute to the community. The event, which coincides with our National Day Celebrations, allows staff and students to show their gratitude to the nation and is a fitting finale for our young changemakers and leaders!

“My leadership journey in Regent has enabled me to understand that I am not alone. I have learnt about the importance of teamwork and communication skills to be an effective and transformational leader. Being a leader is never a bed of roses, but I have grown to embrace challenges and to adopt a growth mindset.”

Neo Yun Zan Joeie, President of Student Council (2022 – 2023)

Applied Learning Programme (ALP)

Creating & Innovating for the Future

Advancements in technology have seen Singapore placing an increasingly heavy emphasis on research and technology in recent years. As our country moves towards becoming a Smart Nation, it is important to equip students with relevant skills that will give them a head start in their future careers. At Regent Secondary School, we aim to do this through our Applied Learning Programme (ALP), which exposes our students to the field of Science, Technology, Engineering, and Mathematics (STEM).

Each year, our Secondary One students learn how to research and design their own remote-controlled cars with the guidance of their trained ALP educators. Students are also taught how to write code using block programming tools such as the micro:bit to automate and control the movements of their remote-controlled cars. These cars are then put to the test at an exciting interclass competition at the end of the semester!

At Secondary Two, our students build on their foundations in coding to operate the M5GO, a programmable micro device. They also use block programming to control SMART home applications using Internet of Things technology. Indeed, coding is an increasingly fundamental skill and a “lingua franca” in our digital world, and we hope for our Regenites to be future-ready thinkers, inventors, and creative problem-solvers!

Secondary One students coding to control their RC car

It is interesting to learn that I can control many appliances in the house using the M5GO! Having a SMART home is indeed convenient.

Aspirations Programme

Discovering Your Strengths, Developing Your Potential

Dreams of yesteryear seemed simpler: to be a doctor, lawyer, teacher, accountant... But young people today face more complex transitions into adulthood. An increasing array of paths in education is open to them to realise their goals.

Students exploring their Aspirations

Regent’s Aspirations Programme gives students the opportunity to actively explore their passion and interests and chart their own paths towards their goals. Discover, Decide, Develop and Dream – these four themes encompass Regent’s Aspirations Programme which students are progressively exposed to over their four years in Regent. As they journey through the lower secondary years, students discover academic strengths that will pave the way to their desired goals. In the upper secondary years, students explore their interest in post-secondary options and embark on learning journeys to tertiary institutions and programmes that give them relevant exposure.

In the graduating years, students pursue the dreams they have shaped. Regent’s signature programmes for the graduating students include Aspirations Camp, Career Talks, Course Advising and Early Admissions Exercise programme which offer them opportunities to explore their aspired careers and courses of study. This progressive journey leads students to complete their secondary school education with confidence as they take on their desired post-secondary course and eventually their dream vocation.

Co-Curricular Activities

Nurturing Leaders, Igniting Passion

At Regent, we believe that every student deserves a chance to shine. With a wide selection of Co-Curricular Activities (CCA) to choose from, there are abundant opportunities for each student to discover something that can ignite their passion! From Uniformed Groups to Performing Arts, from Sports to Clubs – Regent offers it all.

With our strong culture in the appreciation of a holistic education, CCA is a platform through which Regenites can discover their passion and talents while developing character and competencies that will prepare them for a rapidly changing world. Teaming up with experienced coaches and instructors, our teachers are dedicated to providing the best CCA experience that develops not only the mind and body, but the hearts of our students as well.

Every year, the school participates in various competitive platforms – including but not limited to National School Games and Singapore Youth Festival Arts Presentation – to bring forth the best in our students. To instill a sense of gratitude in our students, we embark on Values in Action projects that take our students out of the classrooms and into the real world to make a difference to those in need.

CCA Leaders

I have grown to be a more confident leader over the years in my journey as a NPCC cadet. Through the different opportunities that the Unit has had, I am able to lead my cadets in engaging the residents in the neighbourhood through our Crime Prevention talks. Through these efforts, we do our part to make Singapore the safest place in the world.

Outdoor Education

Strengthening Character, Building Resilience

The opportunities for learning at Regent extend far beyond the classroom as students take on experiential challenges that build resilience, relationships and leadership in an outdoor environment. Our Outdoor Education programme offers a progression of experiences culminating in a series of camps for students across the levels. The Outdoor Education programme, which offers both Basic Leadership Training and Advanced Leadership Training, allows students to disconnect from the distractions of

technology and reconnect with the world outside the school. It provides an opportunity for them to explore the external environment in a safe setting, learn from mistakes and develop perseverance and adaptability.

The activities are designed to draw from students a greater range of skills and talents that they may never have known they possessed. Using different approaches like problem-based learning and design thinking, tasks are crafted to suit the learning needs of the students. Students take responsibility for their own learning through various project tasks which integrate several subject disciplines. The activities also provide opportunities for students to develop their teamwork and collaborative skills through tasks that require communication and interdependence.

Did You Know?

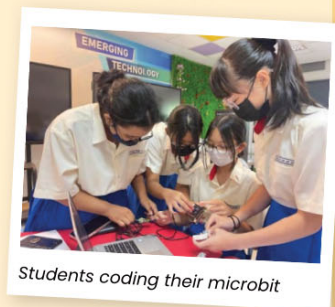

Applied Learning Programme

Developing Digital Learners

The world is changing fast and Regenites are staying ahead of the game!

Conceptualising, constructing, and programming their own remote-controlled vehicles are just some of the things that our students do as part of our Applied Learning Programme (ALP) on Emerging Technologies. Through engaging hands-on activities using block programming tools such as micro:bit, we seek to imbue in students a deeper appreciation of developments in the world of Science, Technology, Engineering, and Mathematics (STEM).

Students will emerge from this programme equipped with skills such as computational thinking, problem solving, logical reasoning, and data handling, which will stand them in good stead for life and learning in this digital age!

Changemakers' Room

A Space for Students, by Students

Looking for a space to interact with like-minded peers?

The Changemakers Room offers a safe space for students to catch up on their studies or hang out with friends! Students are given opportunities to design, create and manage the space themselves. They put together ideas and plan for activities for their fellow peers such as a hike to Bukit Timah Hill and to explore their self-made Escape Room!

Designed for comfort and bonding, in the room, we have modular tables that facilitate group discussions, a variety of board and electronic games, carom boards, and brand new pool and foosball tables!

Students hanging out in the Changemakers Room

Community Youth Leadership Programme

Transform Yourself, Transform Society

What if you had only sixty seconds to convince others to buy into your idea?

To be a transformational leader, communicating effectively is key. The IGNITE Cohort Leadership Workshops is an important cornerstone of our Community Youth Leadership Programme at Regent, where our Secondary One to Three students embark on the Leadership Challenge to learn how to identify social causes to undertake and to galvanise others as advocates for change.

Through this, we hope to see the next Greta Thunberg!

Student Leaders welcoming parents during Open House

Regent Sports Fiesta

Fun Beyond the Classroom

It's not all work and no play at school, as Regenites have the opportunity to enjoy some sporting action at our annual Sports Fiesta, where a convivial and carnival-like atmosphere awaits!

Students participating in games

Helmed by the Physical Education (PE) Department, the Sports Fiesta features exciting tournaments in sports such as frisbee and football for students to showcase skills learnt during PE lessons and to engage in a spot of friendly competition. In fact, these inter-class games are amongst the most highly-anticipated events of the school year! Carnival-style game booths put up by our very own student leaders are also a highlight of the Fiesta and the perfect way for all to have some fun and cheer.

With great company and games galore, what's not to like about Sports Fiesta at Regent?
